## WELCOME LETTER

Dear Colleagues,

welcome to the **World Congress of Confocal Microscopy**.

The Congress will be focused on the practical applications of Confocal Microscopy in both the clinic routine and the scientific activity. You will take advantage from lectures and reports on the experience of the major international confocal groups actively working on this interesting and progressively spreading technique. Experts and non-expert confocalists will interact in active discussions with the purpose of a challenging and exciting exchange of knowledge.

The **pre-congress course** will be an occasion to enter in the topic through a short revision of confocal features from new to advance **(from zero to hero)**.

The **Angelicum Conference Center**, easily reachable by public transportation, is a unique conference center in the heart of historic Rome. Richly steeped in history, the Angelicum has received Popes, heads of state and many of the most powerful and important figures over the last 300 years.

Enjoy Rome!

With best regards,

Presidents

Giovanni Pellacani

Marco Ardigò
